NATIVE PEOPLES' CONCEPTS
OF HEALTH AND ILLNESS

February 1 - February 13, Library hours
Exhibits on 1st and 3rd Floors

Native Voices explores the interconnectedness of wellness, illness, and cultural life for Native Americans, Alaska Natives, and Native Hawaiians. Stories drawn from both the past and present examine how health for Native People is tied to community, the land, and spirit. Through interviews, Native People describe the impact of epidemics, federal legislation, the loss of land, and the inhibition of culture on the health of Native individuals and communities today.

The U.S. National Library of Medicine (NLM) developed and produced *Native Voices: Native Peoples' Concepts of Health and Illness*. The American Library Association (ALA) Public Programs Office, in partnership with NLM, tours the exhibition to America's libraries.

(Grades 4 – 6; Sage Room)

Book description: 12-year-old Theodore “Teddy” Roosevelt Fitzroy has a murder on his hands and trouble on his tail. Henry, the hippopotamus at the brand-new nationally known FunJungle, has gone belly up. Even though it's claimed he died of natural causes, Teddy smells something fishy and it sure ain't the polar bear's lunch. Dealing with the zoo's top brass proves to be nothing but a waste of time. They want to see

any trace of Henry's death disappear like yesterday's paper, so Teddy sets out to find the truth. With the help of Summer McCracken, a feisty girl with secrets of her own, the two narrow down their prime suspects. Is it Martin Del Gato, FunJungle's head of operations who dislikes kids and hates animals even more? Or J. J. McCracken, the owner of FunJungle and Summer's father, who has more concern for the dough he's raking in than the animals in the zoo? As their investigation goes on, Teddy gets squeezed on all sides to quit asking questions, or Henry won't be the only one to turn up dead. The deeper Teddy and Summer get, the more the danger mounts – because when it comes to hippo homicide, the truth can't be kept in a cage!
