

# Bubble Wands

## Instructions:

1. Grab your supplies.
2. Shape your pipe cleaners. Since pipe cleaners are so easily bendable you can always change your shape or try again.
3. If you want to make getting the perfect shape even easier you can find objects around your house with the shape that you want! You might have to go on a shape hunt to see what different shapes you can find in your house.
  - Tip: you can use cookie cutters to make great shapes. Just wrap your pipe cleaner around the outside of the cookie cutter.
4. Your wands will need a handle. If your shape took a whole pipe cleaner to make, you'll need another to make the handle. Make sure that your shape is closed by wrapping one end of your pipe cleaner around the other. Take your second pipe cleaner and wrap one end around the bottom middle of your shape.
5. If your shape is smaller, you will just use one pipe cleaner. After you've made your shape, you will wrap the end of your pipe cleaner around to close the shape. The left over part of your pipe cleaner will be the handle.
6. Now it's time to add beads. Take any beads you want and thread them onto the handle of your bubble wand. You can do a pattern or any assortment! After you are satisfied with your beads, bend the bottom of the handle so that the beads won't fall off.
7. Now your unique bubble wands are ready to go!

Extra: what shape do you think your bubbles will be when you blow them through your bubble wands?

## Materials:

- Pipe Cleaners
- Beads
- Something to help shape your bubble wand\*

\*Not provided by the library, use what you have at home.
